

The EarthCare™ Green Guide

Your guide to Triple S EarthCare® products from (Member Name).
Products in this guide meet recognized green standards
or have features that contribute to the preservation
and sustainability of a healthy environment.

The EarthCare™ Green Guide

What is EarthCare™?

Caring for the environment and providing a healthy workplace are demanding tasks that offer unquestionable long term benefits. Determining what is truly “environmentally friendly” or “green” has been a confusing process. The development of recognized standards greatly improves our ability to make purchasing decisions that contribute to the sustainability of a healthy environment for all.

The presence of the Triple S EarthCare seal indicates that a product meets “green” standards from a recognized organization (such as Green Seal, USGBC or the EPA) or the product offers significant features that contribute to the preservation and sustainability of a healthy environment. Look for the Triple S EarthCare seal when you want to make the places where we work, live, learn and play healthier.

This Triple S EarthCare Green Guide was created to help facility managers get started with Green Clean.

8-Step Program

Green Cleaning represents a better way to keep your facility safer and healthy for our employees and patrons. Use this guide as a tool to get your green program started.

Step #1 – Create a Plan

- Consider writing a mission statement – i.e. To provide a cleaner, safer, healthy environment for all of the staff, students, patrons of XYZ Company [School System].
- Your plan should consider the people who are involved, the products required and the procedures to use them

Step #2 – “Stop Dirt at the Door”

- 80% of dirt comes from the outside
- Mats at all entrances – inside and out
- Use high quality mats – longer life
- 10-12 feet in length
- Preferably rubber backed
- Direct traffic onto the mats – use barriers

Step #3 – Use Green Seal Chemicals

- Inventory existing cleaners and replace with Green Seal or Environmental Choice approved Cleaners.
- Consider a closed dilution control system.
 - Focus on touch points to reduce cross-contamination – doorknobs, etc.
 - Apply disinfectants properly – use roper dwell time to use minimal amount of product.
 - Carpet extracting – use air blowers to reduce the chance for mold growth.
 - Spills – quick clean-up will require milder and fewer chemicals.

Step #4 Ensure Proper Vacuuming

- Use CRI (Carpet and Rug Institute) Green Label Vacuums.
 - Soil Removal – the vacuum must remove a set quantity of soil from carpet in four passes.
 - Filtration & Dust Containment – must not release more than 100 micrograms of dust particles per cubic meter of air.
 - Carpet Appearance Retention
- Vacuum Filter Bag Program/Schedule
 - Check filter bag before each use; log book quick.
 - Don't wait until filter bags are full.
- Ergonomic – your equipment should protect the user's health, reduce fatigue and injuries.

Step #5 – Changing Cleaning Tools

- Microfiber cleaning cloths
 - Ensure proper techniques – dust from top to bottom; always fold/refold the cloth.
- Microfiber mops
 - Lightweight
 - Less chemicals
 - Quieter
 - Holds dust
- Merlin Eraser Sponge
 - Constructed of unique material, just add water; requires no chemicals.

Step #6 – Use Green Paper Products

- Follow EPA Comprehensive Procurement Guidelines for Sanitary Paper/Tissue
- Use roll tissue where applicable

Items	Post Consumer Fiber %	Total Recovered Fiber %
Bathroom Tissue	20-60%	20-100%
Paper Towels	40-60%	40-100%
Paper Napkins	30-60%	30-100%
Facial Tissue	10-15%	10-100%

Step #7 – Use Green Can Liners

- Follow EPA Comprehensive Procurement Guidelines for Can Liners - 10-100% post consumer content

Step #8 – Recycling Program

- Implement an effective recycling program - paper, cans, bottles, plastics, cardboard
- Rinse food containers and soda cans to not attract pests
- Train occupants so they understand how to properly dispose of refuse
- Make occupants responsible for separating different types of refuse

Additional Steps

Consider other steps to "green" your facility:

OmniAir Odor Management Systems

- Low VOC's
- No propellants
- Components recyclable
- No batteries

TouchFree Devices – reduce cross contamination

- AutoFlush for toilets and urinals
- AutoSoap Dispensers
- Auto Towel Dispensers

Water Saving Devices

- AutoFaucet Infrared & Surround Sensor
- ZeroFlush Waterless Urinals

Entryway Matting

The following mats meet the criteria for the US Green Building Council LEED-EB Entryway Systems:

Mat Recommendations

- 80% of the dirt in a building comes from the outside. Carpet length should be a minimum of 10 feet. A longer mat is better.
- It is important to guide traffic so that entrants walk the entire length of the mat.
- The backing material is not specified by LEED-EB. Triple S recommends rubber backed mats. The use of vinyl is highly controversial in the green community due to disposal issues.

SSS Tough Grip Entrance Mat

- Constructed with high quality continuous nylon yarn.
- Nylon yarn is tightly twisted and heat set for exceptional durability. Resists staining and fading from the sun.
- Solid nitrile rubber backing captures the dirt and moisture in the mat; prevents soiling under the mat.
- 10 feet length is the standard length to comply with LEED.
- Custom Sizes: 3' and 4' widths up to 24' in length, 6' width up to 20' in length.
- Standard Sizes: 2x3, 3x4, 3x5, 3x10, 4x6, 4x8

Green Cleaning: Entryway Systems Requirements*

Utilize entryway systems (grills, grates, mats etc.) to reduce the amount of dirt, dust, pollen and other particles entering the building at all entryways, and develop the associated cleaning strategies to maintain those entryway systems, as well as the exterior walkways.

Considerations

High void volume within fibers that provides space for removed dirt to be trapped below the matting face surface and water to spread to larger mat area to improve drying. This inhibits dirt retracing and mold/mildew growth. Also high void volume mats are easier to clean to a cleaner state when vacuumed or shaken out.

- Even fiber height to provide maximum scrapping surface at the show/mat interface. Also, even fiber height improves vacuuming suction efficiency.
- Solid backing captures the dirt and moisture in the mat, preventing soiling under the middle of the mat and reduces re-dirting the floor surface under the mat when being placed back into service after cleaning.
- A non-porous backing inhibits mold and mildew growth within the backing.
- The use of mold/mildew resistant materials in the mat construction to prevent mold/mildew growth with the materials.
- Fire retardant ratings that exceed DOC-FF-1-70 Nation Fire Protection Association ratings and can reduce insurance costs.
- Electrostatic Propensity levels of less than 2.5 KV, which means that interpersonal contact, should not feel electrical discharges when contacting other people or objects".

EarthCare® Cleaning Products

The following Triple S Cleaning Products have been approved by the Green Seal Organization.

Atlas Multi-Purpose Cleaner Degreaser

User and environmentally friendly water-based cleaner degreaser. Dissolves and emulsifies all types of soil. Penetrates and easily removes grease, oil, ink, coffee and other tough problem soils from any washable surface safely.

Product No. 13135 4x1 gallons

Infinity Glass Cleaner

Removes smudges and greasy fingerprints. For use on glass, Plexiglas, chrome, plastic and other surfaces. This heavy duty glass cleaner is ideal for use in restaurants, cafeterias, institutional kitchens and industrial facilities.

Product No. 13141 4x1 gallons

Fresh Start Washroom Tub & Tile Cleaner

Removes soap scum, water scale, urine deposits, lime, suntan and body lotions and other tough soils. Also removes unpleasant odors caused by urine and mildew from porous surfaces like floors and walls. Ideal for use in restrooms, locker rooms and shower areas.

Product No. 13147 4x1 gallons

Summit Heavy-Duty Cleaner

Removes grease in kitchens around stoves, ovens and vent hoods. Used on floors, walls and other hard surfaces. Degreases shop tools, equipment and machinery. Also effective against industrial grease, oil, animal fats, permanent marker and ink.

Product No. 13144 4x1 gallons

This product meets Green Seal's environmental standard for industrial and institutional cleaners based on its reduced human and aquatic toxicity and reduced smog production potential.

Green Seal GS-37 Standard for Industrial and Institutional Cleaners

- Concentrate is non-toxic to humans
- Concentrate doesn't contain carcinogens or reproductive toxins
- Concentrate is not corrosive to skin or eyes
- Concentrate is not a skin sensitizer
- Concentrate is not combustible
- Use solutions are not toxic to aquatic life
- All individual ingredients are readily biodegradable
- Use solutions don't contribute to eutrophication (no phosphates)
- Product is sold as a concentrate
- Primary packaging is recyclable
- Does not contain specified prohibited ingredients

Navigator Dilution Management System

Click-n-Clean. Simple system requires minimum training time. Color-coded Concentrate / RTU labels help prevent incorrect application and potential misuse of product. Closed system prevents waste of concentrate through inaccurate mixing and helps control associated costs. Compact refill and dispensing unit requires less storage space and can reduce storage costs. High RTU yields results in dollar savings.

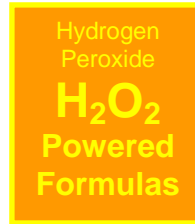

Navigator #23 Atlas H2O2 Powered Multi-Purpose Cleaner Degreaser
2 liter (#13167)

Navigator #24 Compass H2O2 Powered Neutral Floor Cleaner
2 liter (#13168)

Navigator #25 Infinity Glass Cleaner
2 liter (#13169)

Navigator #26 Summit H2O2 Powered Heavy-Duty Cleaner
2 liter (#13170)

Navigator #27 Fresh Start H2O2 Powered Restroom Cleaner
2 liter (#13171)

Floor Care

Legacy™ Metal-Free Floor Finish

Legacy is an environmentally preferable metal free floor seal and finish formulated with the most advanced polymer technology. Legacy meets today's need for a finish that contains no zinc or other heavy metals that can be harmful to wastewater treatment systems. This low odor finish has exceptional durability and can be maintained with scrub and recoat procedures, spray buffing or high speed burnishing.

Product No.	48052	4x1 gallons
	48053	1x5 gallons

Take-Down™ Low Odor Floor Stripper

Take Down is a very low odor, non-toxic, non corrosive, non-butyl floor seal and finish remover. Specially designed to remove metal free floor finishes as well as conventional floor finishes, this fast-acting stripper dissolves multiple coats of finish without harsh alkalis, butyl cellosolve, or strong ammonia odors. No neutralizing needed. Controlled foam and free-rinsing characteristics assure that no residue is left behind to interfere with subsequent finish applications.

Product No.	48054	4x1 gallons
	48055	1x5 gallons

Compass Neutral Floor Cleaner

Low sudsing cleaner with a neutral pH is formulated for use with auto scrubbers. Excellent for general purpose cleaning and damp mopping. Special water softening formulation traps hard water deposits in solution so floors dry clean and clear of dulling film. Contains no inorganic ingredients.

Product No.	13138	4x1 gallons

XLERATOR® Hand Dryers

XLERATOR® is the first hand dryer to achieve GreenSpec approval because it meets a number of GreenSpec standards; conserves energy, has low maintenance requirements and reduces waste.

XLERATOR® also helps your facility qualify for LEED (Leadership in Energy and Environmental Design) Credits under EA Credit 1 (optimize energy performance) and EA Prerequisite 2 (minimum energy performance). EA Credit 1 is now a mandatory credit for any LEED certified facility.

Foam Soap Dispensing Systems

You'll Love the Luxurious Lather of Triple S Foam Soaps.

New Triple S Foam Soap Dispensing Systems are available in different sizes, styles and colors. Sanitary-sealed collapsible-refill keeps germs out. Each refill comes with a new dispensing valve – no clogging, consistent accurate dispensing. SSS New Day Foam Fresh Soap is fragrance-free and dye-free and is Green Seal Certified (GS-41). SSS FoamClean Lotion Skin Cleanser has a pleasant, tropical fragrance, is ruby pink in color and is also Green Seal Certified (GS-41). Our foam soap provides you with an extraordinarily pleasant handwashing experience.

Product No.

Foam Fresh System 1250 mL

- 34091* Foam Fresh New Day Hand Soap, 1250 mL, 3/cs
- 34088 Foam Fresh Dispenser, Gray, 6/cs
- 34089 Foam Fresh Dispenser, Black, 6/cs

Foam Fresh TouchFree System 1200 mL

- 34018 Foam Fresh TouchFree New Day Hand Soap, 1200 mL, 2/cs
- 34007** Foam Fresh TouchFree Dispenser, Gray, 12/cs
- 34008** Foam Fresh TouchFree Dispenser, Black, 12/cs

SSS Foam Fresh Counter Mount System 1500 mL

- 34019* Foam Fresh Counter Mount New Day Hand Soap, 1500 mL, 2/cs
- 34010 Foam Fresh Counter Mount Manual Dispenser, Chrome, 1/cs
- 34017 Foam Fresh Counter Mount TouchFree Dispenser, Chrome, 1/cs

* Available first Q2008 ** Requires 3 C batteries

SSS FoamClean Wall Mount System 1000 mL

- 44098 FoamClean Lotion Skin Cleanser, 1000 mL, 6/cs
- 44099 FoamClean Dispenser, Dove Gray, 6/cs
- 44119 FoamClean Dispenser, Black, 6/cs

SSS FoamClean System

- 44222 FoamClean Lotion Skin Cleanser, 950 mL Pump Bottle, 8/cs

SSS FoamClean Counter Mount System 1000 mL

- 44602 FoamClean Counter Mount Lotion Skin Cleanser, 1000 mL, 4/cs
- 44246 FoamClean Counter Mount Dispenser, Black, 1/cs
- 44247 FoamClean Counter Mount Dispenser, Ivory, 1/cs

The following Triple S Vacuums are Green Label approved by the Carpet and Rug Institute:

SSS Speedster 600 Back Pack Vacuum

The Speedster 600 delivers speed, efficiency and comfort and offers excellent dust and soil removal in any commercial application. 928 watt motor, 60' Safety Orange cord, 6 quart soil capacity, 68 dB sound level, heavy duty attachment kit, 3/3/3/lifetime warranty, weighs 9 lbs.

- #56001 Speedster 600 BPV
- #56002 Speedster 600 Filter Bags –20x10/pk

SSS Speedster 1000 Back Pack Vacuum

For power, strength and rugged durability. It's the most powerful and highest-capacity back pack vacuum available from Triple S. 1340 watt motor, 60' Safety Orange cord, 10 quart soil capacity, 69 dB sound level, heavy duty attachment kit, 3/3/3/lifetime warranty, weighs 11 lbs.

- #56003 Speedster 1000 BPV
- #56004 Speedster 1000 Filter Bags – 20x10/pk

CRI Green Label The Carpet Industry Standard

The tests follow a procedure that has been developed by carpet manufacturers and vacuum cleaner manufacturers and peer reviewed by scientists who are respected for their expertise in the study of maintenance and indoor air quality.

Soil Removal – The soil removal test protocol requires that the vacuum cleaner must remove in 4 passes a satisfactory quantity of soil from the standard test carpet.

Dust Containment – The dust containment test protocol evaluates the total amount of dust particles released into the surrounding air by the action of the brush rolls, through the filtration bag, and any air leaks from the vacuum cleaner system. This protocol requires that a vacuum cleaner will release into the surrounding environment no more than 100 micrograms of dust particles per cubic meter of air, well below levels stated in the National Ambient Air Quality Standards.

Carpet Appearance Retention – The test protocol for appearance retention requires that the vacuum cleaner should affect the appearance of the carpet no more than a one-step change, based on one year of normal vacuum use.

Vacuum cleaners must meet all three elements of the Standard in order to obtain authorization to display the official CRI Indoor Air Quality Testing Program Label or CRI Logo.

NexGen Microfiber System

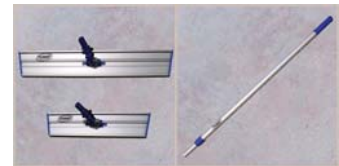

NexGen advanced microfiber technology is EPA-recognized, American Hospital Association recommended, and confirms to JCAHO Environment of Care Standards 1.3, 2.3, and 4.0. These super absorbent, highly launderable, lint free products, remove four times more dirt and bacteria than a conventional cloth, and with only tap water removes over 98% of all bacteria.

NexGen microfiber is also environmentally friendly, and is recommended in our EarthCare green cleaning program to enhance cleaning performance, while saving water, cleaning agents and chemicals.

SSS NexGen Microfiber Starter Kits				
89064	SSS Microfiber Starter Kit #1 includes (1) of each: 70" Extension Pole #89017, 18" Damp Mop Pad-Velcro Backing #89001, 18" Aluminum Frame #89013		1/kit	2.4
89065	SSS Microfiber Starter Kit #2 includes: (1) 70" Extension Pole #89017, (2) 18" Damp Mop Pad-Velcro Backing #89001, (1) 18" Aluminum Frame #89013, (1) Orange Microfiber Cloth-16"x16" #89032		1/kit	2.9
89066	SSS Microfiber Starter Kit #3 includes: (1) 70" Extension Pole #89017, (2) 18" Damp Mop Pad-Velcro Backing #89001, (1) 18" Aluminum Frame #89013, (1) Orange Microfiber Cloth, 16"x16" #89032, (1) 20" Flex Frame #89035, (1) 20" Ultra Hi-Duster Sleeve #89038		1/kit	3.5
89067	SSS Microfiber Starter Kit #4 includes (1) of each: 26 String Wet Looped Mop #89022, 18" Looped End Dust Pad-Slant Slip Backing #89009		1/kit	1.2
89068	SSS Microfiber Starter Kit #5 includes (1) of each: 30 String Wet Looped Mop #89023, 24" Looped End Dust Pad-Slant Slip Backing #89010		1/kit	1.4
89069	SSS Microfiber Starter Kit #6 includes (1) of each: 30 String Wet Looped Mop #89023, 36" Looped End Dust Pad-Slant Slip Backing #89011, 20" Flex Frame #89035, 20" Ultra Hi-Duster Sleeve #89038		1/kit	2.3

Odor Management

Odor management is necessary in a host of applications, especially restrooms. The OmniAir™ Continuous Odor Management carries the EarthCare™ seal because it emits low VOCs, has no propellants, requires no batteries and the refill components are recyclable. The dispenser has no moving parts so it makes no noise. Refills last 60-90 days. Consider alone the labor savings and dollar savings when batteries don't have to be replaced.

OmniAir Continuous Odor Management System

- 74359 OmniAir Dispenser (White)
- 74358 OmniAir Dispenser (Chrome)

OmniAir Fragrance Refill

- 74361 Citrus Twist
- 74363 Blue Wave
- 74360 Arctic Mist
- 74364 Mint Fresh
- 74362 Spring Bouquet
- 74365 OmniAir Freshness Pack
(Contains one each of listed refills above)

OmniAir Try & Buys

- 74366 OmniAir Try & Buy
Contains one White dispenser & one Citrus Twist refill
- 74367 OmniAir Try & Buy
Contains one White dispenser & one Arctic Mist refill

Ice Melters

SSS Easy Choice Ice Melter

Easy Choice is the best choice where there is vegetation. Most ice melting compounds are harmful to vegetation. Grass, shrubs, trees and plants are expensive to replace and maintain. The ingredients in Easy Choice are known to actually help green the grass in the spring. The red colored pellets are easy to see and prevent over application (source reduction). Excellent in the coldest climates -25°.

Towel & Tissue

Triple S EarthCare™ Towel and Tissues are manufactured from 100% recycled materials and meet EPA guidelines:

EPA Comprehensive Procurement Guidelines for Paper

Sterling Jumbo Roll Tissue

58001	SSS Sterling Soft Jumbo Jr. Roll Tissue 1-ply White, 2000' feet/roll, 12/cs	Fits Dispenser #78250
58002	SSS Sterling Soft Jumbo Jr. Roll Tissue, 2-ply White, 1,000', 3.3" core , 12/cs	Fits Dispenser #78250

Sterling Soft Bathroom Tissue

78135	SSS Sterling Soft Bath Tissue Roll, 1-ply, 1000 sheets, 4.25" x 3.8", 96/cs
78150	SSS Sterling Soft Bath Tissue Roll, 2-ply, 500 sheets, 4.25" x 3.8", 96/cs

EPA Comprehensive Procurement Guidelines for Paper

Sanitary tissue products include bathroom and facial tissue, paper towels, napkins, and general-purpose industrial wipers. They are generally sold in rolls or sheets and are used in personal care, food service, and cleaning applications. The grades of sanitary tissue products covered in the CPG are manufactured for use by restaurants, hotels, schools, government agencies, and other similar commercial and institutional buyers. Some recycled-content sanitary tissue products are softer, stronger, and more absorbent than others.

Item	Post consumer Fiber (%)	Recovered Fiber (%)
Bathroom Tissue	20-60	20-100
Paper Towels	40-60	40-100

Can Liners

SSS Terra-Renew™ Blended-Recycled LLDPE Can Liners

The EarthCare® seal indicates that Terra-Renew™ can liners meet or exceed EPA guidelines for Post-Consumer Waste Content. They're made from a combination of Post-Consumer and Post Industrial materials.

Applications

Terra-Renew™ liners are made from recycled materials, so they're an environmentally better choice. Perfect for cost-conscious users looking for a thick bag suited to heavy-duty applications like sharp, heavy or irregular waste.

Features

- Super tough – great puncture and tear resistance.
- Designed for extra heavy-duty use – available in 1.00 to 2.00 Mil.
- Coreless, perforated rolls for ease of use and storage.
- Leak-proof star seal.
- Available in Black.

SSS Futura Super-Flex HAO (Higher Alpha Olefin) LLDPE Can Liners

Applications

This bags works in the widest variety of applications, including heavy or sharp objects, wherever puncture and tear resistance is needed. Because it's manufactured for maximum source reduction, Futura can liners are also an environmentally responsible choice.

Features

Super hexene liners are produced using two-thirds less petroleum-based raw material, resulting in films that are thinner, but stronger, than comparable linear low density films.

- Less raw material consumed.
- Less energy used to manufacture.
- Lower material handling costs.
- Ultra-tough performance, thanks to Super-Flex 100% HAO resins.
- Suitable for heavy, irregular waste at 0.51 to 1.4 Mil.
- Coreless, perforated rolls for ease of use and storage.
- Leak-proof star seal.
- Available in White, Clear and Magnum Blue.
